

GRADUATE ENGINEER

As a result of Plant Integrity Management's continuing success and expansion, we are looking for a talented **Graduate Engineer** to be based at our office in Blackburn, Aberdeenshire.

You will be expected to support senior engineers in varied integrity related disciplines, including safety, reliability and maintenance studies.

Responsibilities of this position include but are not limited to;

- Provide engineer assistance on assigned projects, e.g. detailed analysis of data using engineering methods and associated reporting
- Undertake condition assessments and risk analysis of equipment to establish inspection schemes
- Assist in the development of integrity management systems
- Support the Company's software and training development programme
- May be requested to take lead role to co-ordinate project activity, ensuring the project implementation remains in accordance with quality and project plans
- Assist with the development of company procedures/systems
- Assist with quality audits and internal management reviews

As part of your development, you will be actively encouraged to use your judgement as an Engineer to attain project conclusions and subsequent recommendations.

Although this role would be suited to an individual looking to sustain a rewarding career at this level, opportunity to progress will be provided to the candidate demonstrating capability to advance through the Company's engineering grades.

Full training and support will be provided to the successful candidate wishing to achieve CEng or IEng status. A mentor will be assigned to provide professional support to facilitate a timely progression to the Engineering Council Registration.

Desired Skills and Experience

Successful candidates will have a first degree in a scientific or engineering discipline. Candidates with relevant HNC / HND qualifications may also be considered.

Candidates must be eligible to work within the UK.

About the Company

Plant Integrity Management Ltd (PIM) provide consultancy and strategic management support, for critical plant and equipment, to help clients manage the function and integrity of their assets.

PIM represents a collection of engineers with an extraordinary amount of experience and knowledge within the fields of integrity management and technical safety. All our people aspire to lead the industry by promoting a step change in the quality and value of integrity management support.

PIM is dynamic, innovative and focused on driving change, with an emphasis on the strategic management of integrity and the provision of operational support.

How to Apply

To apply, please forward your **CV together with a cover letter** to detail your suitability for the role and email to **info@pim-ltd.com** or send to: Plant Integrity Management Ltd, Woodburn House, Woodburn Road, Blackburn, Aberdeenshire, AB21 0RX. Closing date TBC.
