**PIM Relief**

Revolutionising PSV Management

**PIM  
RELIEF**

**PIM Relief is a tailor made product based on comprehensive industry experience:**

- Development of a PSV management philosophy for Maersk Oil Corporate standards.
- Development of PSV RBI methods for Maersk Oil (Denmark and Qatar), BP, Britannia, Chevron, and ENGIE E&P UK Limited.
- Management and implementation of Talisman's quantified PSV RBI method.
- Current ongoing management and update of PSV RBI for Maersk Oil Denmark and Maersk Oil Qatar.

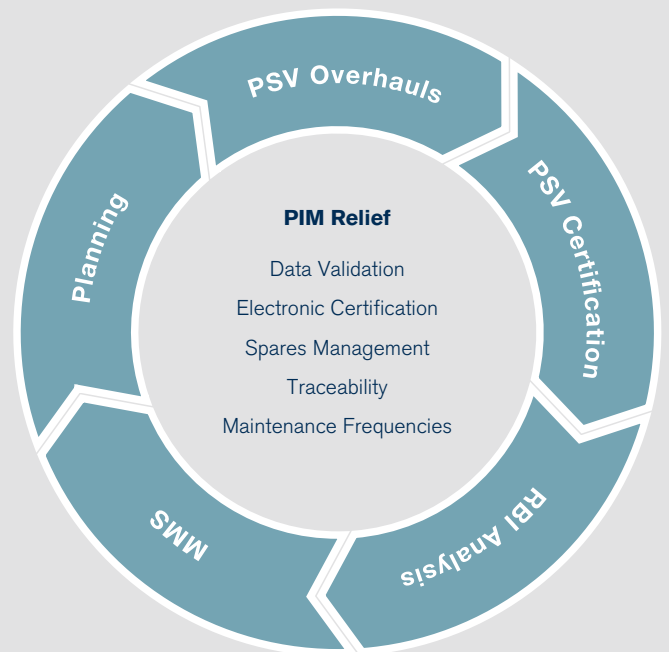

**PIM Relief is a cloud based pressure safety valve (PSV) management system.**

**Developed by Plant Integrity Management Ltd's (PIM) engineers and drawn from their years of front line operational experience this paperless tool is the perfect solution for any company looking to take its management of PSVs to the next level.**

PIM Relief manages and records data relating to all aspects of the PSV workflow cycle from the test and recording of overhaul results through certification to risk-based inspection (RBI) analysis and the rescheduling of test dates. Quite simply it revolutionises PSV management.

**Key benefits**

- Simple and intuitive system to input data with built-in safeguards to prevent incomplete records.
- Workflow driven interface which promotes quality and continuity.
- Robust risk based analysis algorithm which provides semi-automatic calculation of RBI intervals.
- Better accountability through a complete register of PSVs.
- Intelligent resource planning tool to create future PSV campaigns.
- Comprehensive reporting tools with one click export to allow customised analysis.
- In the offshore environment certification data can be entered in to PIM Relief via a preconfigured Toughbook. As soon as the device has an internet connection the new information can be easily uploaded to the cloud and is then available to other users.
- Information is securely stored whilst easily accessible globally; PIM Relief is a secure web based application which has been optimised for low bandwidth operation and can be accessed via any internet browser.
- Additional media (scans, photos, pdfs etc.) can be uploaded to PIM Relief.
